

Phillip Agrusa, M.D.

PROFILE

Dr. Agrusa was born and raised in Southern California. After the conclusion of his military service, he looked for a place to raise his young family and his sights fell on Idaho. He joined OGA in 1999 and was one of the first physicians to begin delivering babies at the St. Luke's Meridian Medical Center. While he enjoys all aspects of obstetrics and gynecology, he has special interest in pelvic and vaginal surgery. With his children now grown and in college, he is able to enjoy more time on the golf course or hunting and fishing in the Idaho outdoors.
